# Easily swap out keyboards and mice with plug and play connectivity.
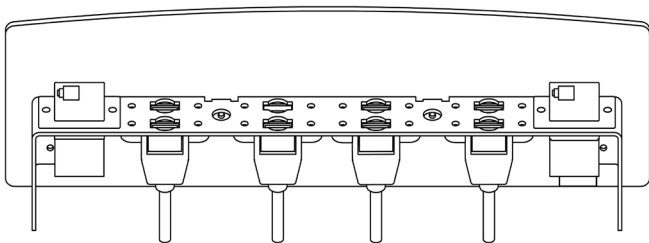

Data Dock brings simplicity to your fingers, allowing users to quickly connect and disconnect keyboards and mice without interruption to work activities.

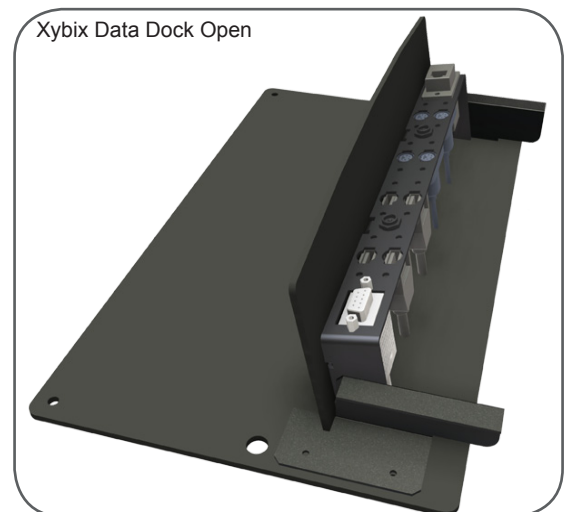

Xybix Data Dock

Data Dock Features

◉ Data Dock is flat panel, flip-open USB connector plate, located on the Xybix keyboard front work surface.

◉ Flips up easily for user access and closes flush with desktop surface.

◉ Data Dock allows users easy access to add/change keyboards, mice and other personal electronics without having to access the CPU unit.

◉ Wiring is concealed and organized behind the work surface, eliminating dangling cords and clutter.
